Tim, I don't think you should even attempt to post a new map if they go home before you. Not only to make sure the map appears but that it shows the data they intend.

I mean, as we've been told, people are pouring over this site at 2 in the morning, IS IT NOT SO??

I'm SOOO glad you told me that, Jeff! That is exactly what would completely FREAK me out at midnight, with absolutely no one around. I probably wouldn't have the mental faculties at that point to test it live. ☺

**Subject:** RE: The map I-frame will most likely change.

Tim, the only adjustment I made to the code posted there now, was to reset the iFrame height to 450 and width to 650. Danny want the map to be those dimensions.

Important note - the map on there now didn't work in draft/revision mode. The ONLY way I could test it was to post it live. SO if they give you all NEW map iframe code, beware.

Also, their code might come with CSS class tags... just ignore them. Drupal will strip them out but it doesn't seem to matter however (thankfully).

Yeah, they usually are straightforward, but I remember an I-frame going bonkers on me once on a Region 8 page. ☺

Looks pretty straightforward. Just change this once we get the code:

```
<div class="embed-container"><iframe frameborder="0" height="450" marginheight="0"
marginwidth="0" scrolling="no"
src="http://epa.maps.arcgis.com/apps/Embed/index.html?webmap=0225eaf42bb64e649f922d383182e99a&am
109.3119,36.6887,-
106.439,37.9381&amp;bing=true&amp;zoom=true&amp;scale=true&amp;search=true&amp;searchextent=true&
title="Gold King Mine Release Surface Water Sampling" width="650"></iframe></div>
```

Should be a straightforward I-frame then adjust the height and width.

We will get the code from the GIS people

If I run into technical difficulties with that (and there's no support here pretty soon), it may have to wait until the morning! ☺ Most stuff is super simple, but this one has a chance of being a little bit tricky.

It appears there is a more robust version that the area commander would like to have in that page
